Education

California Polytechnic State University, San Luis Obispo

Expected Graduation: June 2027

Bachelor of Science in Computer Science

GPA: 3.00

- **Related Coursework:** Data Structures, Proj-Based Object-Oriented Programming, Introduction to Computer Organization, Design and Analysis of Algorithms, Intro to Database Systems, Systems Programming
- **Current Coursework:** Programming Languages

Experience

Day Counselor

June 2025 – July 2025

Cal Poly Engineering Possibilities in College

San Luis Obispo, CA

- Monitored and facilitated engineering related laboratories for ten students in grades 6-12 each week.
- Guided and educated students on career and college-related questions concerning Computer Science and various other branches of engineering.
- Participated in counselor meetings to evaluate and refine strategies to maintain student behavior and engagement during group activities and engineering laboratories.

Electronics Integration Team Member

September 2024 – January 2025

Society of Women Engineers - Team Tech

San Luis Obispo, CA

- Surveying and refining strategies to fit Abbott Laboratories' specifications of biomechanical surrogate for the left side of the heart.
- Collaborating in a multidisciplinary team with the aim of using computing to integrate a functional and effective biomechanical surrogate for the left side of the heart.
- Various approaches to implement product functionality were analyzed by collaborating with other team members and other development teams.

Projects

Undergraduate Student Researcher

July 2025 - Current

React, Vite, Javascript, CSS, Git

- Supervised a lab of 35 middle school students during computer science outreach sessions.
- Conducted research studying how early programming exposure influences underrepresented groups' pursuit in computer science.
- Co-developed CoBloP, a game-based block programming framework meant to teach foundational computer science concepts.
- Currently collaborating on the development of CoBloP, adding collaborative features, multilingual support, and complex coding games.

Personal Portfolio Website

October 2024

HTML, CSS, Git

- Designed and developed a personal portfolio website to showcase technical and creative skills.
- Integrated a Portfolio and downloadable Resume page to present background experience.
- Built an accessible and responsive layout for all users using HTML and CSS.

Skills

Languages: Python, Java, Assembly (RISC-V), SQL, Javascript

Technical Skills: React, Express, HTML, CSS, Git, Figma, Microsoft Suite, Google Suite

Other: Microsoft Suite, Google Suite

Interests: Frontend Software Development and Testing
